

On behalf of the Office of Primary Care, Physical Medicine & Rehabilitation , and Innovation Ecosystem, we want to thank you for implementing the National Diffusion of Excellence Best Practice project of Embedding Physical Therapy in Patient Aligned Care Teams. “PT in PACT”

As part of this, it is vital to be able to track your facility data for participation, access, same day service, satisfaction, outcomes, and other data points. Please set up your clinics for PT in PACT to have a primary stop code of 205 and the secondary be 323. This creates a pairing of **205/323** for the clinics that are used when the therapist is embedded into the PACT team.

Please share with local leadership and Group Practice Managers that this:

- * Does not impact Primary Care Metrics or PCMM
- * Does not impact Primary Care Clinical Reminders
- * Allows therapists continue to get workload credit for Office of Productivity and Staffing Reports

We appreciate your local medical centers time and energy to make this happen.

Email VHACIHPACTPTDiffusionTeam@va.gov if you have questions or encounter barriers.

Sincerely,

Angela L. Denietolis, M.D.
Executive Director, Office of Primary Care

Joel Scholten
National Director, Physical Medicine and Rehabilitation

Mark Havran DPT, ATC, CSCS
Physical Therapy Executive, Rehab & Prosthetics Services
